

LITHUANIA MEETING – DENİZ ÇETİN (TÜRKİYE, İZMİR)

1st May Monday

I got up at nine in the morning. Domas and his mother were awake when I got up. Breakfast was ready. I liked the breakfast very much, that was very filling. After the breakfast we went out and met up with Ege and his friend. They explained their education system in the conference hall of the school. Then we toured in the Gymnasium. And we had a coffee/tea break. We played a game by visiting Radviliskis. I didn't understand the game because the Lithuanians always spoke in their own language. In some places, they took photos and videos. Then we made soap in chemistry class.

2nd May Tuesday

It was funny that teaching arduino to Lithuanians. They got it immediately. Then we went to another class. We made some measurements and presented them there. My presentation was short but my English skills are only enough to this. Then we came to the Hill of Crosses. The view was beautiful. We took very nice photos. Then we went back to the school. Each country performed its own traditional dances. Then we went to a restaurant to have dinner. After dinner, we went to the sauna at Pijus's house. I didn't get in the sauna but I had fun.

3rd May Wednesday

We came to the school at 7 pm and got in the bus. After 2-hour journey, we arrived at Kaunas College. Robotics classes were awesome. I am sure that it's so funny to work in those classes. The library was like a labyrinth, but it was beautiful. Then we went to the Vilnius Energy Technologies Museum. I liked that place too. After this we went to the Vilnius Castle. The view was perfect. From there we went to the Vilnius Cathedral. That square was awesome too. It was like Paris or London. There are lots of luxury cars everywhere. We found a souvenir shop there and we bought some souvenir. We had dinner at Mc Donald's and we came back to Radviliskis by bus. I think this day is the best day of the week.

4th May Thursday

I had a lot of fun making the robot. I built our robot and the others found the necessary parts. I didn't have much fun in sumo competition. And also traditional dance was so tiring but funny.

5th May Friday

We got in the bus in the morning. This time, the Lithuanians didn't come with us. The flower garden we went to didn't interest me. When we came back to the school they gave us certificates and a thermos as a gift. I think the thermos is very useful and good gift. After lunch me, Barkın and Arda came to the central park and we played volleyball. Then I came back home.
